

Harshit Sathone

+91-9404552733 — harshitsathone@gmail.com — LinkedIn — Github — Website

Summary — GCP-certified Backend Engineer (Professional Cloud Architect) specializing in scalable Spring Boot microservices and DevOps automation. Expertise in high-volume systems, Kafka pipeline optimization, and cloud-native deployments (GCP/AWS). Proven track record enhancing system resilience and CI/CD efficiency.

Skills

Technologies Spring Boot, Jenkins, Docker, Kubernetes, REST APIs, Git, GitHub, MongoDB, PostgreSQL, Kafka, Multi-threading
Cloud GCP, AWS
Languages Java, Python, BASH Scripting

Experience

Persistent Systems Limited

Oct 2025 – Present

Senior Software Engineer

- Led development of Spring Boot applications processing 2M+ insurance records daily, improving throughput by 35% compared to the previous system.
- Optimized Kafka pipelines to handle 75K+ events per min with less than 200 ms average latency, boosting real-time processing reliability.
- Partnered with DevOps to enhance CI/CD, cutting release cycles from 2 weeks to 5 days.
- Drove observability improvements (logging, metrics, tracing), reducing average incident resolution time by 40%.

Persistent Systems Limited

Sep 2023 – Sep 2025

Software Engineer

- Built Spring Boot services processing 1M+ daily insurance records, improving system performance by 30%.
- Deployed and monitored applications on GCP, achieving 99.9% uptime SLA.
- Collaborated with cross-functional teams to improve scalability and fault tolerance, resulting in 15% fewer production incidents.

Projects

Gadget Gizmo, an E-commerce project

Ongoing Personal Project

- Designed and developed RESTful APIs for a microservices-based backend using Spring Boot.
- Integrated with MongoDB and GCP Cloud Storage, supporting storage of 10K+ products.
- Implemented Spring Security with JWT authentication, improving login security and reducing unauthorized access.
- Applied TDD with JUnit & Mockito, achieving 85%+ unit test coverage.
- Implemented Kafka pipelines capable of handling thousands of concurrent requests.

NanoLink

Jan 2026

- Designed and developed a TinyURL-style URL shortener using Java and Spring Boot, following a microservices-based, event-driven architecture.
- Implemented Kafka-based eventual consistency, Redis caching, and collision-handling logic to ensure scalability, resilience, and high read throughput.
- Enabled horizontal scaling of read/write services behind load balancers with a single-writer persistence model for data consistency.

Education

Yeshwantrao Chavan College of Engineering, Nagpur

Bachelor of Engineer in Information Technology

Cum. GPA: 8.31

Achievements

- Google Cloud Platform Professional Cloud Architect Certification - May 2024
- Google Cloud Platform Associate Cloud Engineer Certification - Dec 2023
- Design and Analysis of Algorithms (NPTEL) - April 2022
- IEEE Paper Publication - 2023: Identification of Ayurvedic leaves using Deep Learning Paper Link
